Subsidies and costs of EU energy

Ecofys 2014 by order of European Commission

The report, commissioned for the European Commission by Ecofys, shows that total direct energy subsidies1 in the EU in 2012 were estimated at €122 billion euros, with fossil fuels (coal and gas) and nuclear making up 36% (€43 billion euros) and renewables getting slightly less at 34% (€41 billion euros). These figures show that renewables cost the taxpayer less than dirty energy alternatives.
