# **The Chernobyl Nuclear Power Plant accident : its decommissioning, the Interim Spent Fuel Storage ISF-2, the nuclear waste treatment plants and the Safe Confinement project**

**Fulcieri Maltini**

The author has been responsible for the programme with the EBRD Nuclear Safety Account team. This paper describes the design and construction of a new interim spent fuel storage, the liquid and solid radioactive treatment plants and the construction of a unique and very large New Safe Confinement that, when completed, will be moved over of the reactor Unit 4.
