Chernobyl Still Draws Concern

It has been over 20 years since the world's worst nuclear disaster, but Chernobyl is still generating dangerous radiation levels. As Bill Plante reports, a new steel arch could provide a solution.

Chernobyl Still Draws Concern

Sealing Chernobyl's Reactor #4

"Only On The Web" : Bill Plante explores the construction site at Chernobyl, where a massive steel arch will be built over the dangerous reactor to contain radiation for at least one hundred years.

Sealing Chernobyls Reactor #4

Chernobyl's Abandoned City

"Only On The Web" : Bill Plante visits Pripyat, Ukraine, just a mile away from the Chernobyl nuclear power plant. When disaster struck, residents were given 36 hours to leave. They never came back.
